

PURCHASING POLICY

According to the sustainability policies of the hotel Royal Palm Resort & Spa we compromise us to a sustainable purchase.

- For this reason, we prefer purchasing locally than a national or international purchase, depending if the product meets the expectations of the hotel.
- We won't provide products from protected species, neither for the preparation of food nor for third parties sale.
- We are in a constant dialogue with suppliers to reduce the environmental impact by the packaging of products and the possible introduction of returnable packaging.
- In the purchase of new equipment we will always value aspects of environmental protection and we will verify that the products are water and energy efficient.
